Reflection:
A Model of the Earth’s Atmosphere

Directions: Answer the following questions. Use your model of the Earth’s atmosphere and notes.

1. What is the atmosphere?

2. What are the two most abundant gases in the earth's atmosphere AND about how much of each gas is found in the atmosphere?

3. What are the layers of the atmosphere (in order)? What is a unique characteristic of each layer?

4. Which layer of the atmosphere contains the ozone layer? Why is this layer important?

5. In which layer does virtually all weather take place?

6. In which layer might you find a satellite?

7. How high does each layer of the atmosphere reach above the earth's surface?

8. Which layer of the atmosphere do we live in?
